# SYED RIZWAN BUKHARI

**Computer Engineering Diploma Student | Aspiring Software Developer**

Budgam, Jammu and Kashmir, India • Phone: +91 6005320065 • Email: syedrizwanbukhari18@gmail.com

Portfolio: rizwan-bukhari-1.vercel.app • GitHub: github.com/rizwanbukhari-dev

## PROFESSIONAL SUMMARY

Computer Engineering diploma student currently in the 5th semester at Government Polytechnic College Ganderbal, actively developing practical software engineering foundations. Experienced in building responsive, client-side web utilities and interactive applications using JavaScript, React, and Python, complemented by disciplined daily workflows in Linux environments and procedural problem-solving.

## EDUCATION

**Diploma in Computer Engineering (Three-Year Program)** *Currently in 5th Semester*

Government Polytechnic College Ganderbal • Ganderbal, Jammu and Kashmir

**Secondary Schooling (Class 10th)** *Completed*

HS Chewdara • Jammu and Kashmir

## PROJECTS

**PDFKit — Web-Based PDF Utility Application** Live Demo • GitHub Repository

**Technologies:** JavaScript (ES6+), PDF-lib, HTML5, CSS3, Vercel

- Engineered a client-side document utility enabling users to merge multi-file PDFs, extract pages, compress documents, and convert images to PDF format directly in the browser.
- Implemented all document transformations in browser memory using PDF-lib, ensuring complete user privacy with zero file uploads to external servers.
- Designed a responsive, accessible interface with zero heavy UI libraries and deployed the production application on Vercel.

**RizKey — Touch-Typing Web Application** *Interactive Platform • React & TypeScript*

**Technologies:** React 19, TypeScript, Tailwind CSS, Vite, Recharts, Web Audio API, Vitest

- Developed a minimalist touch-typing application providing real-time WPM, raw speed, and accuracy calculations across customizable time and word limits.
- Created a 15-lesson structured typing academy with an interactive virtual QWERTY keyboard illustrating proper finger placement zones and shift key technique.
- Implemented targeted practice drills with weak-key error tracking, interactive typing mini-games, and performance charts using Recharts; authored 38 unit tests using Vitest.

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming Languages:** | Python, C, JavaScript (ES6+), TypeScript |
| **Web Technologies:** | HTML5 (Semantic Markup), CSS3 (Flexbox & Grid), Tailwind CSS, React 19 |
| **Tools & Platforms:** | Git, GitHub, VS Code, Vite, Vercel |
| **Operating Systems:** | Linux CLI (Bash, Core Utilities, File Permissions, Shell Navigation), Windows |

## ADDITIONAL INFORMATION

| | |
|---|---|
| **Relevant Coursework:** | Relational Database Management Systems (DBMS & SQL), Operating Systems & Linux Architecture, Computer Networks, Data Structures, Procedural Programming in C & Python |
| **Engineering Focus:** | Client-Side Web Architecture, Command-Line Utilities, Core Algorithms, Software Reliability |
