Syed Rizwan Bukhari

Computer Engineering Student & Aspiring Developer

Budgam, Jammu & Kashmir, India • Email: syedrizwanbukhari18@gmail.com • Portfolio: https://rizwanbukhari-1.vercel.app/ • GitHub: github.com/rizwanbukhari-dev

PROFILE SUMMARY

Computer Engineering diploma student currently in the 5th semester at Government Polytechnic College Ganderbal, based in Budgam, Jammu & Kashmir. Focused on building practical, client-side web utility applications, strengthening core programming logic in Python and C, and developing daily workflows in Linux operating systems.

EDUCATION

Diploma in Computer Engineering (Three-Year)

Currently in 5th Semester

Government Polytechnic College Ganderbal • Ganderbal, Jammu and Kashmir

Relevant Coursework & Labs: Relational Database Management Systems (DBMS & SQL), Operating Systems & Linux, Computer Networks, Data Structures, and Programming in C & Python.

Secondary Schooling (Class 10th)

Completed

HS Chewdara • Jammu and Kashmir

Foundational coursework in Mathematics and General Sciences.

TECHNICAL SKILLS

Web Development:	HTML5 (Semantic Markup), CSS3 (Flexbox & Grid), JavaScript (ES6+, DOM Manipulation)
Programming Languages:	Python (Core, Scripting, Automation), C (Procedural Programming, Logic, Pointers)
Developer Tools & Hosting:	Git, GitHub, VS Code, Vercel
Operating Systems:	Linux CLI (Bash Commands, File Permissions, Shell Environment), Windows
Engineering Concepts:	Relational DBMS & SQL Basics, Computer Networks, Fundamentals of Cybersecurity

PROJECTS

PDFKit — Web-Based PDF Utility

Live Demo • https://pdfkit-1.vercel.app/

Technologies: HTML5, CSS3, JavaScript, PDF-lib, Vercel • Repository: github.com/rizwanbukhari-dev/pdfkit.1

• Engineered a lightweight, client-side web utility application designed to solve common document management tasks for students, educators, and CSC operators.

• Implemented multi-file PDF merging, page splitting, document compression, and image-to-PDF packaging entirely inside the browser for privacy and speed.

• Deployed live on Vercel with a responsive, distraction-free user interface.

Personal Developer Portfolio

Live Demo • https://rizwanbukhari-1.vercel.app/

Technologies: Semantic HTML5, Vanilla CSS3, Modern JavaScript, Vercel • Repository: github.com/rizwanbukhari-dev/my-portfolio

• Designed and developed a high-performance personal developer portfolio with zero external framework dependencies for instant loading.

• Integrated GitHub REST API to fetch and render live public repository activity dynamically with responsive card layouts.

• Built with full keyboard accessibility, semantic markup, and fluid responsiveness across desktop, tablet, and mobile displays.
